SUMMARY

Notre Dame Computer Science student (3.88 GPA) with two software engineering internships across full-stack product development and HIPAA-regulated medical software. Shipped production systems end to end, from a profitability platform that improved quoting margins 20% to an open-source safety feature merged into git-cola; incoming AI & Data Engineering Summer Scholar at Deloitte.

EDUCATION

University of Notre Dame | Notre Dame, IN — Expected 05/2028

B.S. in Computer Science, College of Engineering | GPA: 3.88 / 4.00

Minor: Engineering Corporate Practice | Clubs: CS4Good, Computer Club

EXPERIENCE

Deloitte | Government & Public Services (GPS) — Summer 2027

AI & Data Engineering Summer Scholar (Incoming)

AI-Based Medical Image Analysis Lab, CSE Department | University of Notre Dame — 08/2026 – Present

Undergraduate Research Assistant - AI-based medical image analysis under Prof. Danny Chen

- Performed research tasks on real time surgical segmentation models

BPN Solutions | Indianapolis, IN — 05/2026 – 10/2026

Software Engineering Intern (Client-Facing / Forward Deployed)

- Architected and delivered a full-stack job scheduling and profitability platform (Next.js, TypeScript, Node.js, Supabase) as sole engineer, scoping requirements directly with the owner of Roots Ops Landscaping.
- Built per-job profitability analytics that improved quoting margins by 20%, and automated job scheduling and crew notifications.
- Delivered a production refrigerant management system for DEEM, translating client requirements into an EPA audit-ready platform optimized for technician use on mobile.
- Wrote a 200+ test integration suite against a Dockerized SQL Server using test-driven development; set up CI/CD with GitHub Actions and Vercel to auto-deploy on merge.
- Built an e-commerce site for a Detroit-based planter company, working directly with the client to scope requirements.

Sonablate Corp. | Indianapolis, IN — 05/2025 – 07/2025

Software Engineering Intern

- Re-engineered the protected health information (PHI) browser used to manage patient records, migrating the full UI from Java Swing to JavaFX and aligning it with the main application's design system.
- Built encryption, anonymization, and USB-export features for patient records, hardening handling of sensitive medical data to support HIPAA-compliant workflows.
- Integrated PACS (Picture Archiving and Communication System) server functions into the browser's export pipeline, partnering with the Head of IT to connect clinical imaging infrastructure.

PROJECTS

AI Fitness Platform | *FastAPI, PostgreSQL, Next.js, Docker, Dexcom API, Anthropic Claude*

- Built a full-stack platform (FastAPI, PostgreSQL, Next.js) that combines personal Strava, WHOOP, and Dexcom G7 glucose data to generate personalized training plans and coaching using the Anthropic API.
- Engineered an async FastAPI backend integrating four external REST APIs via OAuth 2.0; implemented JWT authentication with bcrypt-hashed passwords and per-user data isolation.

Open-Source Contribution – git-cola (Git GUI) | *Python, Qt, Git — merged 07/2026*

- Shipped an upstream-merged safety feature adding a collapsible diff preview (diffstat + unified diff) to revert confirmation dialogs, preventing users from irreversibly discarding uncommitted work.
- Shared path selection between preview and checkout so the two cannot diverge; extended MessageBox with an expand_details API and added unit tests for the new gitcmds diff helper.

Plated | *Coming soon*

- Checks Notre Dame dining hall menus and sends notifications, with an allergen- and protein-aware meal builder; 10+ users.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, SQL, TypeScript, JavaScript, Bash

Frameworks & Libraries: Node.js, Next.js, React, Fastify, FastAPI, PyTorch, OpenCV, pandas, Tailwind CSS, REST APIs

Tools & Platforms: Git, Docker, AWS, PostgreSQL, Supabase, Twilio, GitHub Actions, Vercel, Linux, Vim

LEADERSHIP & ACTIVITIES

Diabetes Youth Foundation of Indiana | Noblesville, IN — Summers 2022–2024

Junior Counselor Team Leader

- Led a team of six junior counselors supporting campers aged 7–15 in managing type 1 diabetes, mentoring daily self-care while maintaining camp operations across multiple summer sessions.

Student DJ | Independent, Notre Dame, IN — 08/2024 – Present

- Self-taught DJ performing campus gigs; built custom production speakers from scratch with crossovers, woofers, and cabinets.
